Tickets are \$40 each and may be purchased on Eventbrite. Search for "ACE Mentor Program of Rochester"

The mission of ACE is to engage, excite, and enlighten students in the pursuit of careers in the integrated construction industry through mentoring, and to support their continued advancement in the industry through scholarships and grants.

The ACE Mentor Program of Rochester provides insight into the construction industry to 40+ students each year. The students participate in construction site visits, learn roughly 12 disciplines of construction, design and physically construct a playhouse, develop a project through schematic design and present to the public, and observe many other tasks that architects, contractors, and engineers tackle on a daily basis.

The ACE Mentor Program of Rochester is a volunteer-based, not-for-profit organization that relies on donations for scholarships, student supplies, and the development of the upcoming program.
